Admin

An administrator for the CloudGen Access Console.

Device

A user device that has the CloudGen Access App installed.

Envoy Proxy

From [Envoy documentation](#):

Envoy is an L7 proxy and communication bus designed for large, modern, service-oriented architectures.

The Envoy Proxy is part of the CloudGen Access Proxy. It listens to requests and proxies them to the correct destination.

CloudGen Access Proxy

The CloudGen Access Proxy is the software that contains the Envoy Proxy and the CloudGen Access Proxy Orchestrator.

CloudGen Access Proxy Enrollment Link

Required by the CloudGen Access Proxy and used to bootstrap and authorize the service. Obtained only when a CloudGen Access Proxy is created.

CloudGen Access App

Agent software installed in a user's device. Bundles the end-user UI and the CloudGen Access agent.

access-cli

Command-line software used to interact with the CloudGen Access Console.

CloudGen Access Console

Web application to manage the CloudGen Access customer platform.

CloudGen Access Proxy Orchestrator

The CloudGen Access Proxy Orchestrator ensures that the Envoy Proxy is correctly configured.

Requires a valid token (CloudGen Access Proxy enrollment link) that contains the necessary information to bootstrap and authorize the service.

CloudGen Access User Directory Connector

A program that retrieves users and groups from multiple sources and syncs them into a CloudGen Access tenant.

User

An entity associated with a real person that can have multiple devices associated.
