How to Perform a Release Check

https://campus.barracuda.com/doc/95259318/

If your Barracuda CloudGen Firewall displays a dirty release in the **VERSION STATUS** table on the **CONTROL > Licenses** page, Barracuda Networks recommends that you manually perform a release check.

1. Click the **SSH** tab and enter your login credentials.
2. Enter the following command to manually trigger the release check:

```
/etc/phion/bin/phionRelCheck
```

If your Barracuda CloudGen Firewall still displays a dirty release after you have performed the release check, contact Barracuda Networks Technical Support.
