

## Changing Server Credentials

<https://campus.barracuda.com/doc/96016097/>

To change Server Credentials, perform the following steps.

1. At the Confirm selection pane, select a virtual machine.  
The Change Server Credentials **button is enabled**.
2. Click the **Change Server Credentials button**.  
The credentials pop-up is displayed.

3. Make your changes, and then click **OK**.  
**Note 1:** The backup set relies on these credentials to perform the backup. Use credentials that do not change often, else the backup fails.  
**Note 2:** You can authenticate to the following:
  - Unmanaged ESXi host
  - vCenter that manages one or more ESXi hosts
