

## Overview

<https://campus.barracuda.com/doc/96022352/>

The Barracuda Site Security Scanner is an easy-to-use, free tool you can use to scan your customers' sites for various security issues. The scanner crawls a site, the devices in the site, site accounts, and domain policies for security vulnerabilities. You can then generate a report to submit to your customers to help them understand their security vulnerabilities and the select products to improve their security.
