Overview

https://campus.barracuda.com/doc/96022959/

Managed Service Providers (MSPs): See MSP App for information on using the MSP App and activating Barracuda Essentials.

Partners/Resellers: Manage multiple Barracuda Email Security Service accounts using the drop-down menu in the Barracuda Cloud Control web interface. See How to Manage Multiple Accounts for more information.

Note that *Barracuda Email Security Service* and *Email Gateway Defense* are interchangeable in the documentation and user interface for MSPs and partners/resellers.

Be sure to read about License Definitions for the Barracuda Email Protection plan.

With Email Gateway Defense, identify and block spam, viruses, and malware delivered via email messages. Using virus scanning, spam scoring, real-time intent analysis, URL link protection, reputation checks, and other techniques, Barracuda scans email messages and files.

Email Gateway Defense secures your mail by encrypting it during transport and at rest for storage in the cloud. Create and enforce content policies to prevent sensitive and confidential data from being sent out by email.

Once configured, view inbound and outbound email statistics on the **Dashboard** page in the web interface.
