Ability to Exempt from Outbound Encryption

NEW FEATURE

You now have the ability to add exemptions to outbound encryption policies. On the Outbound Settings>Content Policies page> **Message Content Filter**, select the **Do not encrypt** action filter to customize outbound encryption exemptions for subject, headers, body, attachments, sender, or recipient.

Note that when you select **Don't Encrypt** on a **Message Content Filter** and **Encrypt** on a **Predefined Filter**, the Message Content Filter exemption takes precedence over the Predefined Filter and the message will not be encrypted.
