Microsoft 365 Deployment

https://campus.barracuda.com/doc/96023082/

Managed Service Providers (MSPs): See MSP App for information on using the MSP App and activating Barracuda Essentials.

Note that *Barracuda Email Security Service* and *Email Gateway Defense* are interchangeable in the documentation and user interface for MSPs.

Email Gateway Defense provides:

- Critical multi-layer security and compliance for Microsoft 365;
- Effective protection against spam and phishing emails;
- Threat detection and message blocking;
- Full functionality free for 14 days.

Specify Email Gateway Defense as an *inbound mail gateway* so that Email Gateway Defense filters out spam and viruses, and then passes the mail on to Microsoft 365.

Specify Email Gateway Defense as the *outbound mail gateway* so that Email Gateway Defense processes the mail by filtering out spam and viruses before final delivery.

Advanced Threat Protection protects against advanced malware, zero-day exploits, and targeted attacks not detected by Email Gateway Defense virus scanning features.

Where to Start

- Step 1 - Set Up Email Gateway Defense for Microsoft 365
- Step 2 - Configure Microsoft 365 for Inbound and Outbound Mail
