

Step 1 - Set Up Email Gateway Defense for Microsoft 365

<https://campus.barracuda.com/doc/96023083/>

Managed Service Providers (MSPs): See [MSP App](#) for information on using the MSP App and activating Barracuda Essentials.

Note that *Barracuda Email Security Service* and *Email Gateway Defense* are interchangeable in the documentation and user interface for MSPs and partners/resellers.

For each Barracuda Cloud Control account, you can have either a linked Barracuda Email Security Gateway appliance or an Email Gateway Defense subscription.

You cannot use a single Barracuda Cloud Control account for both a linked appliance and the service subscription.

This article assumes you are deploying Barracuda Networks Services *for the first time*. If you previously deployed another Barracuda Networks product and want to migrate to Barracuda Email Protection, contact your Barracuda Networks sales representative.

Ensure Connectivity and Redundancy

Open your firewall ports to allow the IP address ranges for LDAP connectivity based on your Barracuda Networks instance; see [Email Gateway Defense IP Ranges](#).

(Optional) [Configure Microsoft 365 to block inbound email not originating from Email Gateway Defense IP address range](#).

Important

Email Gateway Defense connects with your network from various IP addresses, including performing LDAP lookups. To ensure that the service can connect with your network, allow traffic originating from the range of network addresses based on your Barracuda Networks instance; see [Email Gateway Defense IP Ranges](#).

Activate Email Gateway Defense

To complete the setup you must have a Barracuda Cloud Control account. If you do not already

have an account, go to <https://login.barracudanetworks.com/> and click **Create a User**. Enter your name, email address, and company name, and specify whether this is a partner account. Click **Create User**; for partners, be sure to read [How to Add a Managed Customer Account](#). Follow the instructions emailed to the entered email account to create your Barracuda Cloud Control account. See [Password Complexity Policies](#) before setting up your password. See also [Partner Accounts](#).

1. Go to <https://login.barracudanetworks.com> and log in with your Barracuda Cloud Control credentials.
2. Navigate to **Home > Admin > Email Protection**.
3. Click **Start a trial**. Complete the form with your information and then start the trial. *Alternatively*, if you have already purchased Email Gateway Defense, click **Enter an Activation Key**. You should have received an email with a product activation key. For more information, see [How to Activate Products Using an Activation Key](#).
4. On the **Plan Details** page, select the bundle for your trial and enter the number of **Users** who will be using Email Gateway Defense. Then click **Continue**.
5. Complete your Account Details, then click **Continue**.

Managed Service Providers (MSPs): See [Barracuda Essentials for MSPs](#) for information on getting started with ECHOplatform and activating Barracuda Essentials. Note that *Barracuda Email Security Service* and *Email Gateway Defense* are interchangeable in the documentation and user interface for MSPs and partners/resellers.

Partners see a different option on this page. Make your selection, then continue with the process below.

Select from the following Client Account options, then click **Continue**.

1. **Add this service to an existing Barracuda account** – Select the desired Account from the drop-down menu, and select your location from the **Location of Use** drop-down menu.

2. **Create a new Barracuda account for this service** – Enter the new account details.
