

Price - per - GB by Plan

<https://campus.barracuda.com/doc/96025757/>

The Price-per-GB by Plan billing strategy allows you to bill at a flat price-per-GB. Different accounts can be billed at a different price-per-GB.

The price-per-GB an account that is billed depends on the plan it is associated with, and the usage service to which that plan is mapped.

Setting Up Price-per-GB by Plan

To set up the Price-Per-GB by Plan, perform the following steps.

1. Make sure you have products created in ConnectWise for each price point you would like to charge. See Product Creation in ConnectWise.

The following display is an example of a highlighted block storage product.

Product ID	Description	Price	Cost	Taxable	Serialized	Serialized Cost	Type	Category	Subcategory	Class	SLA
10GB Per Host	10GB Per Host							Fixed Cost Service	Managed Services	Managed Services	Non-Inventory

Note: Each product can have a different price.

2. At the ConnectWise Integration page, select the **Billing** tab.

- Content Shield Plus Service
- Essentials Service
- Intronis Backup Plan

- Select **Intronis Backup Plan**.
The Intronis Backup field is displayed.

Intronis Backup Plan: Level:

Cancel Save

- Select the **Intronis Backup Plan** drop-down arrow to display your plan options.
Note: The accounts associated with this plan have their usage sent to the ConnectWise products associated with this level through the cross-reference.
 For example, the Plan field would show the following to correspond to the ConnectWise plan shown in Step 1 above: **10 GB Plan Block 1**.
- At the Level field, type a level for this entry.
- Select the **Update Total Usage** radio button in the Usage Value section.
Note: This selection ensures that every account is billed per-GB for total usage value.
- Click the **Save** button.
- In ConnectWise, create the cross-reference for this level and BackupUsage type with the correct agreement type and your chosen product. See [Creating Cross-references in ConnectWise](#).
