Barracuda CloudGen Firewall

Wi-Fi

https://campus.barracuda.com/doc/96026036/

CloudGen Firewall F-Series models equipped with a Wi-Fi interface can provide up to three independent Wi-Fi networks that are compliant with the IEEE 802.11b/g/n standard and that offer strong WPA and WPA2 encryption. Configuration and administration of the Wi-Fi network is fully integrated in the Barracuda Networks security concept.

For more information, see <u>How to Configure a Wi-Fi Network</u>.

Wi-Fi Guest Access

You can configure the Wi-Fi network to be used as a guest network with either a confirmation page or a guest ticketing system.

For more information, see How to Configure Wi-Fi Guest Access.

RADIUS/EAP Configuration for Wi-Fi Authentication

For large networks, you can configure a RADIUS and EAP server to handle user authentication.

For more information, see <u>How to Configure a RADIUS/EAP Server for Wi-Fi Authentication</u>.
