Root Certificates Settings

https://campus.barracuda.com/doc/96026081/

Navigate to the following window on path **CONFIGURATION > Configuration Tree > your box > Assigned Services > VPN Service > VPN Settings > Root Certificates**.

The **Root Certificates** table lists all configured root certificates. A root certificate applies to the X.509 standard.

Setting	Description
Certname	The name of the certificate.
Usage	Describes the usage of the root certificate.
CRL URI	The URL for revoking the certificate.
Status	Reflects whether the certificate is valid.
Issued To	The receiver whom the certificate is issued to.
Issued By	The source who issued the certificate.
Comment	Holds a comment that relates to the certificate.

For more information on how to import a root certificate, see How to Set Up External CA VPN Certificates.
