

Licenses Page

<https://campus.barracuda.com/doc/96026485/>

The **Licenses** page lets you view the license status of your Barracuda CloudGen Firewall. To access the **Licenses** page, open the **CONTROL** tab and click the **Licenses** icon in the ribbon bar.

ACTIVE LICENSES

In the **Active Licenses** table, all active licenses are listed.

ACTIVE LICENSES

Name/Module	License	Expires	HostID	Status
  base-bnvf2000	THAL2000-0001-2000-0001-2000-0001	02.01.2030 01:00:00	float-v1	Float-Confirmed-for-12days
  add-bnvf2000-vp	THAL2000-0001-2000-0001-2000-0001	19.05.2019 19:00:00	float-v1	Float-Confirmed-for-12days
  add-bnvf2000-a	THAL2000-0001-2000-0001-2000-0001	19.05.2019 19:00:00	float-v1	Float-Confirmed-for-12days
  add-bnvf2000-e	THAL2000-0001-2000-0001-2000-0001	19.05.2019 19:00:00	float-v1	Float-Confirmed-for-12days
 URL-Filter				
 energize				
 App-Detection				
 ips				
  add-bnvf2000-w	THAL2000-0001-2000-0001-2000-0001	19.05.2019 19:00:00	float-v1	Float-Confirmed-for-12days

Information on each module is organized in the following columns:

- **Name/Module** – The module name.
- **License** – The license number.
- **Expires** – The license expiration date and time.
- **Host ID** – The hardware ID the license is attached to.
- **Status** – The status of the license.

To open the license configuration, double-click it. For more information, see [How to License a CloudGen Firewall](#).

To see what services are covered by the license, click the **+** icon to the left of the green check mark. This expands the license entry and shows details on the license module.

License Values

The **License Values** section displays details for your license, such as your product model, appliance type, serial number, and number of licensed tunnels.

License Values

```
License: Barracuda
License-Virtual: True
License-Model: VF2000
SSLVPNAC: licensed
Demo Mode: no
Export Mode: no
CC managed: yes
Platform:
Product: vf2000
Configured Appliance: VF2000
Detected Appliance: VM
Serial Number:
Flash based: no
Statistics: yes
Licensed Tunnels: unlimited
Compression: licensed
Hardware Encryption: not-licensed
```

VERSION STATUS

In the **Version Status** table, you can view the version, build date, and status of the installed Barracuda Networks software modules.

VERSION STATUS

Module	Type	Version	Status	Comment
✓ acpf	kernel-module	phionnet_acpf-7.1.0-122.x86_64		7.1.0.120
✓ ktina	kernel-module	phionnet_ktina-7.1.0-138.x86_64		6.0.0.5
✓ URL-Filter	server	phionnet_cofsd-7.1.0-55.i386	Float-Confirmed-for-12days	-
✓ DHCP-Relay	server	phionnet_dhcp_relay-7.1.0-51.i386	Float-Confirmed-for-12days	-

Information on each module is organized in the following columns:

- **Module** – The module name.
- **Type** – The type of module.
- **Version** – The version of the module.
- **Status** – The status of the module, which can be any of the following:
 - Latest Kernel – The latest NGFW OS-compiled kernel.
 - Clean Release – Release version number/binary match.

- Dirty Release – Release version number/binary mismatch.
- No License Found – No license found for this module.
- Not Used – This module is not used.
- **Comment** – Any additional comments.

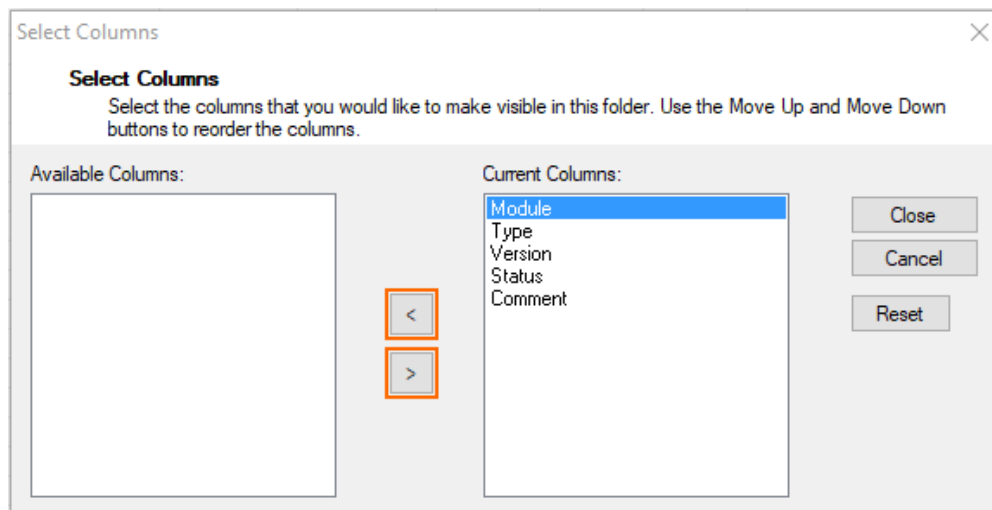

To view more detailed information about an entry, double-click it.

Selecting Categories for Display in the Version Status Table

You can customize the categories of the columns shown in the **VERSION STATUS** table.

To customize the categories:

1. Right-click inside of the display area of the **VERSION STATUS** table.
2. In the pop-up menu, click on **Select Columns....**
3. From the **Available Columns** table, select the category that you want to be displayed in the table.
4. Click on the **>** button to move the information field from the column **Available Columns** to the **Current Columns**. Entries in the table **Current Columns** will be displayed in the list order. Click on **<** to remove the category from the values to be displayed.
5. To the apply changes, click **Close**.

Reordering Columns in the VERSION STATUS Table

To reorder the columns in the process table, drag and drop the column header to your desired position.

HOST IDs

The **Host IDs** section lists the hardware IDs that the node-locked licenses can be attached to.
