

SSH Tab

<https://campus.barracuda.com/doc/96026496/>

The **SSH** page provides access to the SSH console. All SSH connections from the SSH tab use UTF-8 encoding. To use the built-in SSH client in Firewall Admin, click the **SSH** tab.

Routine administrative tasks should be completed with Firewall Admin. Connect via SSH only for system updates or special maintenance tasks.

Barracuda CloudGen Firewall

SSH-Login

Username:

Password:

To manage the information displayed in the window, use the icons in the quick access bar at the top of the page. You can perform the following actions:

- **Send File** – Browse for a file and upload it to the SSH window.
- **Download File** – Download information as a file. To download a file, select **Download File**, enter the complete file name with extension, and hit Enter.
- **Clear Screen** – Delete all information shown in the SSH window.
- **Appearance** – Customize the appearance of the SSH window according to your requirements.
- **Dock/Undock** – Choose whether you want to run commands in the main tab or in a separate window.

For more information on SSH, see [How to Configure SSH](#). For information about the command line interface, see [Command-Line Interface](#).
