

DHCP Tab

<https://campus.barracuda.com/doc/96026520/>

The Barracuda Firewall Admin **DHCP** page allows you to view and modify real-time lease and IP-range information for the DHCP service, when configured. You can also manually delete inactive and relayed leases. To access the **DHCP** page, click the **DHCP** tab in the ribbon bar.

DASHBOARD	CONFIGURATION	CONTROL	FIREWALL	ATP	NETWORK ACCESS CLIENT	VPN	DHCP	LOGS	STATISTICS	EVENTS	SSH
0 Leases in 1 Ranges (0.0% Load)		Delete all Leases in Range		Open DHCP Config							
Name	IP-Address	Start	End	Relay-ID	Hardware-Address	Hardware-Type					
10.0.20.100 - 10.0.20.100	0 Leases - 0.0% used	10.0.20.100	10.0.20.100								
10.0.20.100 - 10.0.20.110	7 Leases - 63.6% used	10.0.20.100	10.0.20.110								
	10.0.20.106				00:1b:a9:85:ac:d6	ethernet					
 Workstation-PC	10.0.20.103	10.04.2013 05:33:57	10.04.2013 17:33:57		54:04:a6:42:aa:1c	ethernet					
10.0.20.101 - 10.0.20.101	0 Leases - 0.0% used	10.0.20.101	10.0.20.101								
10.0.20.102 - 10.0.20.102	0 Leases - 0.0% used	10.0.20.102	10.0.20.102								
10.0.20.104 - 10.0.20.104	0 Leases - 0.0% used	10.0.20.104	10.0.20.104								
10.0.20.106 - 10.0.20.106	0 Leases - 0.0% used	10.0.20.106	10.0.20.106								
10.0.20.108 - 10.0.20.108	0 Leases - 0.0% used	10.0.20.108	10.0.20.108								

Lease Information

The table on the **DHCP** page displays information about lease ranges, single leases, and lease reservations.

The table is divided into the following columns:

- **Name** – Displays the start and end IP address of the range. In addition, the lease consumption of the range is specified by the corresponding icon (from low... to high...)
 - **Green square** – Indicates that client is up and running (ARPAble).
 - **Yellow square** – Indicates that client is relayed (not ARPAble).
 - **Red square** – Indicates that no client is listening on this IP address.
- **IP-Address** – Displays the exact number of leases currently in use in this range and the current lease consumption in this range (in percent).
- **Start** – Displays the time of lease assignment in the following format: dd/mm/yyyy hh:mm:ss
- **End** – Displays the time when the client must renew the lease. The time is displayed in the following format: dd/mm/yyyy hh:mm:ss
- **Relay-ID** – If available, this column provides the client's relaying interface.
- **Hardware-Address** – Displays the client's MAC address.
- **Hardware-Type** – Displays the client's interface type (Ethernet).

To filter the entries, click the **Filter** icon in the top right of the page and specify the filter criteria.

Actions

The **DHCP** page also allows you to manually delete inactive and relayed leases and leased ranges. Click **Delete Lease** or **Delete all Leases in Range**. To refresh the display, click **Refresh**.

When a relayed lease gets deleted, duplicate IP addresses can be created if the lease is assigned twice.

To access the DHCP configuration from the **DHCP** page, click the **Open DHCP Config** icon in the top right of the page.
