

How to Use Barracuda Firewall Admin in Monitor Mode

<https://campus.barracuda.com/doc/96026536/>

When managing your firewall configuration via the web interface, Barracuda Firewall Admin can be used in monitor mode. Monitor mode only allows read-only access to the firewall configuration. All other actions, such as creating PAR files or restarting services can be completed using Firewall Admin. Monitor mode sessions are marked by a small yellow triangle icon in the session tab.

Use Barracuda Firewall Admin in Monitor Mode

1. Launch Barracuda Firewall Admin.
2. In the **Log In** window, select **Firewall**.
3. Enter the **Management IP, Username, and Password**.
4. Click **Sign in**. The Barracuda Firewall Admin management alert pop-up window opens.

5. Click **Monitor via Firewall Admin**.

You can now monitor your firewall with Barracuda Firewall Admin.
