

Access Controller Licensing

<https://campus.barracuda.com/doc/96026748/>

License and activate the Access Controller on the Firewall Control Center **Licensing** page. Secure Connector pool licenses are verified and enforced on the VPN server that handles the SC tunnel, assigning a single license to an Access Controller is optional. For general information about licensing, see [CloudGen Firewall Licensing](#).

Step 1. License and Activate the Access Controller

License the Access Controller on the Control Center. The licenses are automatically downloaded and installed. For more information, see [How to Assign and Activate Single Licenses on a Control Center](#).

On your Access Controller, go to **CONTROL > Licenses** or **CONFIGURATION > Configuration Tree > Box > Licenses** to verify that the licenses are installed.

Step 2. Import the Secure Connector Pool License

Import and activate the Secure Connector Energize Updates (EU) pool license.

1. Log into the Control Center.
2. Go to **CONTROL > Licensing**.
3. Right-click in the **Pool Licenses** section and select **Import Pool License** from the context menu. The **Activate Pool License** window opens.
