

## CloudGen Access on a Virtual Appliance

<https://campus.barracuda.com/doc/96766497/>

The Barracuda CloudGen Access Vx can be deployed on various hypervisors using the virtual images provided by Barracuda Networks. The virtual appliance includes a custom CLI to provide easier management of the Barracuda CloudGen Access Proxy (Orchestrator + Envoy) and the Barracuda CloudGen Access User Directory Connector. Continue with [How to Get Started With CloudGen Access Vx](#). Release notes are here: [CloudGen Access on Vx Release Notes](#).

Note that the virtual appliance automatically updates packages to the latest proxy and connector builds, as well as latest security updates.
