

Patching Stand-alone MS Office and Office 365

<https://campus.barracuda.com/doc/96767129/>

Within Barracuda RMM Patch Management, a multitude of devices can be updated thanks to the emulation of the Windows Server Update Services (WSUS). However, in order for us to update patches inband, they must be made available via WSUS. In the case of Stand-alone Office and Office 365, Microsoft elected to update through different paths and not through WSUS. In short, Barracuda RMM does not handle the patching of these two offerings from Microsoft.

Updating Newer versions Office including 2019, 2021, 365 and beyond...

- **Not available in WSUS** and thus not in Barracuda Patch Management
- Please refer to
