

Integrating Barracuda Incident Response

https://campus.barracuda.com/doc/96767773/

Set up the Syslog

- 1. Sign in to Barracuda Incident Response.
- 2. On menu in the top left, click **Settings**.
- 3. Click the **Syslog Options** tab.
- 4. Toggle **Enabled** to on.
- 5. In IP Address/Hostname, enter barracuda-forensics.skout-build.com.
- 6. In **Port**, enter **6514**.
- 7. Click Save.
- 8. While still in the Incident Response app, in your browser's location bar, take note of the UUID Portion of the URL. For example:
 - If the url is

https://forensics.barracudanetworks.com/report/xxxx-1234-5678-abcdzzz/dashboard , then the xxxx-1234-5678-abcd-zzzz portion is the id.

			Γ	TEST SAVE			

- 9. In Barracuda XDR dashboard, click Administration > Integrations > Barracuda Incident Response.
- 10. In Tenant ID, enter the id.
- 11. Check the **Enabled** box.
- 12. Click Save.

Set Up the API (Optional)

The second step is setting up the API, so that you can create incidents directly from Barracuda XDR Dashboard. This step is optional and not used by the SOC.

- Create a Client ID and Client Secret. Log in to the Barracuda Token Service at <u>https://login.bts.barracudanetworks.com/register</u>. If you are not currently logged into Barracuda Cloud Control (BCC), you must log in using your BCC user credentials before you are redirected to the Barracuda Token Service.
- 2. Click Add Application in the top right.
- 3. On the **Add Application** page, in the **Application Details** section, fill in the **Application name**. In the **Application Scope** section, select following the account level checkboxes:
 - Email Gateway Defense
 - Incident Response
- 4. Click Add Application to register your application.
- On the Application Details page, you can copy your Client ID and Client Secret to the clipboard and enter these values into the appropriate fields on Administration
 Integrations > Barracuda Incident Response. The Client Secret is only available to copy for 15 minutes. However, you can reset it at any time.

If you want to confirm that the integration works correctly, contact the Barracuda Incident Response team and request that they generate a test event.
