Integrating Cisco Secure Endpoint

https://campus.barracuda.com/doc/96767782/

Barracuda XDR can monitor your Cisco Secure Endpoint data by using the Cisco Secure Endpoint API. To integrate the monitoring of your environment, please follow the below configuration procedure. For information on the API please see the reference guide: https://ciscosecurity-amp-00-integration-workflows.readthedocs-hosted.com/en/latest/amp/intro.html#integration-requirements

To Integrate Cisco Secure Endpoint

1. Log in to the **Cisco Security** portal as an administrator.
2. Click **Accounts** > **API Credentials**.
3. In the **API Credentials** pane, click **New API Credential**.
4. In **Application name**, type SKOUT SIEM, then select **Read & Write**.
   You must have read & write access to manage event streams on your Cisco AMP for Endpoints platform.
5. Click **Create**.
6. From the **API Key Details** section, copy the values for the **3rd Party API Client ID** and the **API Key**.
   - Do not close the tab without retrieving these values; the API key is not retrievable once the tab is closed.
7. Test your credentials to make API calls by inputting it into the dashboard and clicking **Test**.
