

## Integrating F5 BIG-IP

<https://campus.barracuda.com/doc/96767856/>

These instructions can also be found on the [f5 website](#).

### Applies To

- Product: BIG-IP, BIG-IP AAM, BIG-IP AFM, BIG-IP APM, BIG-IP ASM, BIG-IP DNS, BIG-IP GTM, BIG-IP Link Controller, BIG-IP LTM, BIG-IP PEM
  - 15.X.X, 14.X.X, 13.X.X, 12.X.X, 11.6.X, 11.5.X
- Product: Legacy Products, BIG-IP WebAccelerator, BIG-IP WOM, BIG-IP PSM, BIG-IP Edge Gateway
  - 15.X.X, 14.X.X, 13.X.X, 12.X.X, 11.6.X, 11.5.X

### Adding a remote syslog server using the Configuration utility Performing the following procedure should not have a negative impact on your system.

Adding remote syslog servers using the Configuration utility is available in BIG-IP 11.1.0 and later.

1. Log in to the Configuration utility.
2. Click **System > Logs > Configuration > Remote Logging**.
3. For **Remote IP**, enter the destination syslog server IP address, or FQDN. (DNS server configuration required)
4. For **Remote Port**, enter the remote syslog server UDP port (default is 514).
5. (Optional) For **Local IP**, enter the local IP address of the BIG-IP system.  
For BIG-IP systems in a high availability (HA) configuration, the non-floating self IP address is recommended if using a Traffic Management Microkernel (TMM) based IP address.
6. Select **Add**.
7. Select **Update**.
8. For BIG-IP systems in a high availability (HA) configuration, perform a ConfigSync to synchronize the changes to the other devices in the device group.
