## Integrating Okta

<https://campus.barracuda.com/doc/96767916/>

To integrate Okta in Barracuda XDR, follow the procedures below:

- To create the API token
- To set up Okta

### To create the API token

---

1. If required, create an Okta developer account.
2. Log in to the Okta developer account.
3. Note the Okta hostname (ex: dev-1234.okta.com).
4. Click **API**.
5. Click **Create Token**.
6. Name the new token and click **Create Token**.
7. Make note of the **Token Value**.
8. Click **OK**.

### To set up Okta

---

1. In **Barracuda XDR Dashboard**, navigate to **Administration > Integrations**.
2. On the **Okta** card, click **Setup**.
3. Select the **Enabled** box.
4. Type the **Okta SubDomain** and **API Key** that you saved in To create the API token, Step 7.
5. Click the **Test** button to verify connection settings and permissions.
6. Click **Save**.

It may take some time for Microsoft's changes to take effect. If the test function says there's no data yet, try saving the settings anyway.
