Integrating SonicWALL Firewall

https://campus.barracuda.com/doc/96767943/

To integrate SonicWALL, do the following procedures, below:

- To configure SonicWALL to forward syslog events
- To set up Barracuda XDR Dashboard

To configure SonicWALL to forward syslog events

SonicWALL captures all SonicOS event activity.

Syslog events are forwarded to QRadar. SonicWALL events that are forwarded to QRadar are automatically discovered and log sources are created automatically. For more information on configuring your SonicWALL appliance or for information on specific events, see your vendor documentation.

1. Log in to your SonicWALL web interface.
2. From the navigation menu, select **Log** > **Syslog**.
3. From the **Syslog Servers** pane, click **Add**.
4. In **Name** or **IP Address**, type the IP address of your QRadar Console or Event Collector.
5. In **Port** , type 514.
   SonicWALL syslog forwarders send events to QRadar by using UDP port 514.
6. Click **OK**.
7. From the **Syslog Format** list, select **Default**.
8. Click **Apply**.

You can find instructions from SonicWALL here.

To set up Barracuda XDR Dashboard

1. In **Barracuda XDR Dashboard**, click **Administration** > **Integrations**
2. On the **SonicWALL Firewall** card, click **Setup**.
3. Select **Enabled**.
4. Click **Save**.
