
Create Backup Set on One Subaccount

<https://campus.barracuda.com/doc/96770907/>

Create Backup Set on one subaccount creates a backup set on a specific agent on a computer.

Example

POST /v2/accounts/username/computers/0000/backupsets

```
{  
  
  "name": "Backupset test1",  
  
  "type": "FILES",  
  
  "selection": ["C:"]  
  
}
```

Response

```
{  
  
  "data": {  
  
    "id": 8  
  
  }  
  
}
```

Full Request Example

```
curl -X POST "https://v2/accounts/username/computers/0000/backupsets" -H "accept: application/json" -H "Authorization: OAuth 5dc02bb64881753b4c37398e20c8f461" -H "Content-Type: application/json" -d "{ \"name\": \"Backupset test1\", \"type\": \"FILES\", \"selection\": [ \"C:\" ]}"
```

Exceptions

For Disk Image Standard, the message, **You cannot select removable media.** displays if one of the volumes selected for backup via the "selection" parameter belongs to a removable drive.
