
Create File System Browsing Session API

<https://campus.barracuda.com/doc/96771637/>

This command is for Files and Folders only. For Disk Image Standard, browse by volume.

The session entity is useful for performance and caching. For example, when browsing large folders or drives, use the same session GUID across browse requests so that the cached results are used.

Input Parameters

None.

Output Parameters

sessionId, String containing a Guid. Store and use this value for future Files and Folders Backup Set Creation browse operations.

Example

```
{  
  
  "sessionId": "59c0c022-31c7-457e-9b00-69e6595d3bf9"  
  
}
```
