

## GET Pending Backup Sets for a Subaccount

<https://campus.barracuda.com/doc/96771933/>

**GET Pending Backup Sets for a subaccount** retrieves the list of backup sets to be created. Authentication is done using a special token created only for that agent. Each agent has its own token and is not able to access data from other computers.

### Example

GET /v2/accounts/username/computers/0000/backupsets

### Response
