
Agent Permissions Validation

<https://campus.barracuda.com/doc/96772153/>

The path needs to be created and authenticated beforehand, using the Validate path API (in the case that the path does not exist, or it's on a network share that requires auth).

This section includes the following topics:

- Input Parameters
- Output Parameters

Input Parameters

diskLocation

path - string pointing to the local or remote path where the virtual disks will be stored on a subsequent Restore API call.

Example:

```
{  
  
  "diskLocation": {  
  
    "path": "c:\\path1"  
  
  }  
}
```

Output Parameters

None when successful, validation error otherwise:

when there are no write permissions on the diskLocation.path location - error message "Need to have read/write permissions on path {path_here}"

Example POST

POST /v2/accounts/test_acc/computers/0000/restore/diskimage/standard/vm/validate/agent

Input Parameters

```
{  
  
  "diskLocation": {  
  
    "path": "c:\\path1"  
  
  }  
}
```

Output Parameters

Response status: 204 No content (for online operation).
