# Browsing a Backup Set File for Revisions

https://campus.barracuda.com/doc/96772259/

This API allows you to browse a Backup Set File for Revisions.

## Input Parameters

**id -** File revision id, obtained via the Browse folder or Browse Drive API calls.

## Example

{

"id": 1446

}

Note that browsing of revisions does not currently support paging at the backup agent level (only browsing a folder for files supports it).

## Output Parameters

The following table provides the parameters and descriptions.

| Parameter | Description |
|---|---|
| **type** | Type of revision: Full or Revision (incremental/differential). |
| **lastModifiedDate** | Last modified date and time of the backed-up file. |
| **size** | Size of file in bytes. |
| **id** | Integer value. ID of the revision record. Use this parameter for sending it over to the restore API to restore this record. |
| **name** | String value. Display name of path of the revision. |
| **hasChildren** | Boolean Indicates whether a subsequent browse at the next level is possible. |
| **backupTime** | Time the backup of the revision is made. |

## Example

Array of revisions, with the following structure:

```
{
   "items": [
      {
         "type": "Base",
         "lastModifiedDate": "2016-02-26T15:32:36",
         "size": 261315950,
         "id": 1445,
         "name": "2/26/2016 5:32:36 PM",
         "hasChildren": false,
         "backupTime": "2016-02-26T17:32:36"
      }
   ]
}
```

## Example GET

GET /v2/accounts/{accountUsername}/computers/{subaccountId}/restore/filesandfolders/browse/backupset/file/{backupsetFileId}

## Example Output

```
{
 "data": {
  "items": [
   {
    "type": "Base",
    "lastModifiedDate": "2016-03-01T15:27:18",
    "size": 694784,
    "id": 18,
    "name": "3/1/2016 10:27:18 AM",
    "path": "",
    "hasChildren": false,
    "backupTime": "2020-03-01T10:27:18"
   }
  ]
 }
}
```
