

Integrating Cylance Protect Endpoint Protection

https://campus.barracuda.com/doc/96773190/

Before starting, contact get your Enablement Engineer to get your orgname.

- 1. In the Cylance tenant page, click **Settings** > **Application**.
- 2. Do the following:
 - Check the **Syslog/SIEM** box.
 - Check the boxes for all event types.
 - In **SIEM**, select *HP Arcsight*.
 - In **Protocol**, select *TCP*.
 - Check the **TLS/SSL** box.
 - In IP/Domain, select cy-event.skout-build.com.

		Test Connection	_

When entering the Customer token, the format is Customer Name:orgname. Make sure there is space before Name:orgname and no space after the colon between Name:orgname. Also, make sure there is no space after Name:orgname. See the example below, where the orgname is ofilsystems:

Custom Token:

Customer Name:ofilsystems

- 3. Click **Test Connection**. Look for a green confirmation notice.
- Once the above changes are made and saved, contact Barracuda XDR so the logs can be verified. If everything is working, the Cylance datasource appears on the dashboard within 1 – 2 hours.

Barracuda XDR
