

API Documentation

<https://campus.barracuda.com/doc/97517617/>

The Barracuda RMM Services API is a web service that provides access to some of the data provided and collected by Barracuda RMM, including the following:

- alerts
- asset tags
- CPU assets
- devices
- fixed disk assets
- groups
- monitor assets
- network card assets
- network interface assets
- optical drive assets
- printers
- Quick Fix Engineering assets
- sites
- software
- system assets
- trouble tickets
- users
- VARs
- video cards

The documentation of the RMM APIs is available in Swagger (<https://editor.swagger.io/>) format and can be found in the following location:

- `http://<HostName>/SCMessaging/ui/index`, where <HostName> is the name of the location where your Barracuda RMM instance is hosted.
