

What's New in Barracuda Campus, November 2022

<https://campus.barracuda.com/doc/97519773/>

November 2022

The Barracuda Campus newsletter is published monthly with a listing of new and updated articles by product. The **Highlights** section announces new product documentation and other major additions or updates to the Barracuda Campus. Check back each month to see What's New!

Please direct feedback and questions to campus@barracuda.com.

Choose Your Product

Highlights

As of **March 1, 2022**, the legacy Barracuda Total Email Protection, Essentials Security, Compliance, and Complete editions are no longer available for purchase. Only existing customers can renew or add users to these plans. For more information on the latest Email Protection plans, see [Barracuda Email Protection](#).

The documentation related to these plans will no longer be available after October 30, 2022. To update your bookmarks, see the following for the latest documentation:

- [Email Gateway Defense \(Formerly Email Security Service\)](#)
- [Cloud-to-Cloud Backup](#)
- [Cloud Archiving Service](#)

Note that MSP customers should continue to follow [Barracuda Essentials for MSPs](#).

- Barracuda Secure Connector SC3 has been released. For more information, see [Hardware Models](#) and [SC3](#).
- Barracuda RMM (Managed Workplace) – Version 2022.1 has been released. See:
 - [Download page](#)
 - [Release Notes](#)
 - [Campus Help](#)
- [Barracuda Site Security Scanner](#) Version 1.1 now available.
- [Barracuda Cloud-to-Cloud Backup](#) – Multiple releases in October 2022.

- [Email Allow List and Best Practices](#) - Added screenshots for Microsoft 365 configuration steps.

Barracuda Message Archiver

Updated

- [Setup Wizard Step 5 - Create Service Account](#) - Updated to include link for EWS configuration for Microsoft Exchange Online.
- [Step 6 - Create Service Account](#) - Updated to include link for EWS configuration for Microsoft Exchange Online.

Barracuda RMM (Managed Workplace)

- Version 2022.1 has been released. See:
 - [Download page](#)
 - [Release Notes](#)
 - [Campus Help](#)

Barracuda Site Security Scanner

The Barracuda Site Security Scanner (SSS) is an easy-to-use, free tool you can use to scan your customers' sites for various security issues. The scanner crawls a site, the devices in the site, site accounts, and domain policies for security vulnerabilities. You can then generate a report to submit to your customers to help them understand their security vulnerabilities and the select products to improve their security.

Barracuda SSS is currently available to all users who have Campus log in credentials.

Version 1.1 of Barracuda SSS has been released, including the new Detected CVEs page, which maps discovered vulnerabilities to the MITRE corporation's Common Vulnerabilities & Exploits (CVEs) to identify the security vulnerabilities that impact your devices so you can easily research and address them.
