Prerequisites

https://campus.barracuda.com/doc/97520585/

The Barracuda Site Security Scanner scans Windows sites only. Linux and Apple devices are discovered, but are automatically excluded from the scan. They are considered unknown devices.

Before you run a security scan, you need the following:

- An installed and functioning version of Barracuda Site Security Scanner. Click this link to install the Barracuda Site Security Scanner.
    - The Barracuda Site Security Scanner requires one of the following:
        - Windows 10 or higher (64-bit only)
        - Windows Server 2016 or higher (64-bit only)
- A working log in for Barracuda Cloud Control. Click here for help getting Barracuda Cloud Control credentials.
- The credentials of a domain admin with rights to access the domain you want to scan.

Important

- The installer automatically installs the following:
    - Visual C++ Redistributable 2015-2022
    - Npcap and Nmap applications
- A reboot is **not** required after install.
