

IPS Policies

https://campus.barracuda.com/doc/98210335/

Configure IPS scanning policies to control the behavior of the IPS engine when an attack is detected. By default, all access rules use the default IPS policy. You can also customize the default settings or create custom IPS policies to apply to your access rules. Each of the created policies can be applied individually.

IPS	Shared Policy Profiles								5	7×+
	Name	Origin	References		Descrip	tion				
0	GloIPSRule	Local	1							
Glo	IPSRule									
IPS		Re	ferences							
									🗸 🛧 🗙 🖉 🕂 🗍) PQ
	Name	Description	Action	Source	Destination	Application	User	URL Filter Match		
0	sc		⊙ [≫] Scan & Enforce	Management IP	DHCP1 Local IP	Any	Any	Any		
1	lpsDefault		⊚ [⇒] Scan & Enforce	Any 0.0.0.0/0	Any 0.0.0/0	Any	Any	Any		

For information on how to customize default policy profiles, see <u>How to Configure Policy Profiles</u>.

Before You Begin

Make sure that TLS Inspection is enabled in the **Security Settings**. For more information, see <u>How to</u> <u>Configure Outbound TLS Inspection</u>.

Create an IPS Policy Profile

Create an explicit IPS policy profile to match individual requirements.

Policy profiles are created on the Control Center. On stand-alone CloudGen Firewalls, you can customize the default profiles and add explicit policies if required.

- 1. (On the Control Center) Go to CONFIGURATION > Configuration Tree > Multi-Range > Global Settings > Global Firewall Objects/Policies.
- 2. Click Lock.
- 3. In the left menu, expand **Policy Profiles**.
- 4. Select IPS.
- 5. To add a new policy profile, click the plus icon (=) at the top right of the window, enter a profile name, and click **OK**.

	Name	Refer	Description	
0	IPSPol	0		Choose a Name
1	MyProfile	0		
				IPS01

6. Click Send Changes and Activate.

The policy profile now appears in the **IPS Shared Policy Profiles** list, and you can create explicit policies for it.

Create an Explicit IPS Policy

- 1. (On the Control Center) Go to CONFIGURATION > Configuration Tree > Multi-Range > Global Settings > Global Firewall Objects/Policies.
- 2. (On a CloudGen Firewall) Go to CONFIGURATION > Configuration Tree > Box > Assigned Services > Firewall > Forwarding Rules.
- 3. Click **Lock**.
- 4. In the left menu, expand **Policy Profiles**.
- 5. Select IPS.
- 6. (Control Center only) Select the profile you wish to create the policy for. The policy list appears under the corresponding tab in the lower window.
- 7. (Control Center only) To add a new policy, click the plus icon (+) at the top right of the lower window. You can also right-click the list and select **Add Policy**. (CloudGen Firewall only) To add a new policy, click the plus icon (+) at the top right. You can also right-click the list and select **Add Policy**.
- 8. Specify values for the following:
 - **Name** Enter a descriptive name for the explicit policy.
 - **Description** Enter a description for the policy.
 - $\circ~$ Action Select an action.
 - **Do Not Scan** IPS does not scan traffic matching the criteria.
 - Scan & Log- IPS only scans and logs the events.
 - Scan & Enforce IPS is enforced.
 - Source / Destination IP/Network Criteria Select the source and destination network, or select <Explicit Network> and enter an IP address / network or a domain that gets resolved to an IP address for the matching.
 - **Application Criteria** Define the application match condition. Add an application the policy should apply to, or create explicit applications. To open the selection menu, double-

click the corresponding field. Selecting applications in the application editor works similar to the process in the objects configuration for the application rule set. For more information, see <u>How to Create an Application Object</u> and <u>How to Create a Custom</u> <u>Application Object</u>.

- $\circ~$ \mbox{Users} Select the users or groups the policy should apply to.
- **URL Category** Specify URL categories the policy should apply to.
- 9. Click **OK**.

S Ibs		
General		
Name	SC	
Description		
Action	⊚ [⇒] Scan & Enforce	•
Criteria		
Source IP/Network Criteria	Nanagement IP	•
Destination IP/Network Criteria	2 DHCP1 Local IP	•
Application Criteria		•
Users	All Authenticated Users	•
	X509Subject=CN=?* user=?*	
	<	>
URL Category		•

10. Click Send Changes and Activate.

The policy is now listed in the lower window can be selected as **Policy** in your forwarding rules. For more information, see the last step in <u>How to Configure Policy Profiles</u>.
