

DNS Security Upgrade to Version 2.0

<https://campus.barracuda.com/doc/98211532/>

The article applies for Windows only. For macOS, iOS, or Android, contact [Barracuda Networks Support](#).

When version 2.0 of the agent is released to all customers, all policies will be migrated to the new version using the new **Web Security** page and policies. The **Web Security** page replaces the **DNS Security** page from earlier versions. See [How to Configure Web Security Policies](#) for details.

CGA Fake Site	-
CGA Fraud	-
CGA General Threat	-
CGA Illegal	-
CGA Malware	-

Initially, upon migration, all categories and domains for which you previously created policies will be updated to the newer categorization, and domains you've allowed or blocked will be migrated as well. This means they will appear in the new **Web Security** screen policies list on machines on which you update the agent to version 2.0. Your old policies will remain for users still using the legacy agent.

 [Web Security](#) > Policies

 Overview	Policies NEW Sources 19 Domains 4			
 Identity	 Search...			
 Catalog	#	Action	Applied to	Details
 Access	 1	 Allow	 1 group Accounting	
 Web Security	 2	 Block	 All team All team	
 Activity	 3	 Block	 1 group Accounting	

Barracuda Networks recommends updating the agent to version 2.0 on all endpoints as soon as the version is released, so that you will not need to make any modifications to policies - they will automatically be migrated. If, however, your users don't upgrade until later, they will have to add policies on the **Web Security** page that they added to the old **DNS Security** page *after* the initial migration.
