

How to Deploy CloudGen Access on VM VirtualBox

https://campus.barracuda.com/doc/98211968/

Download and Import the OVA Image

- 1. See <u>How to Deploy CloudGen Access on a Virtual Appliance</u> and download the VirtualBox OVA image onto your local machine.
- 2. Open the VirtualBox app and click on **Import**. Select the downloaded file zts-virtualappliance-virtualbox.ova and continue with the installation part as explained below.
- 3. Click on **Tools > Impor**t. With *Local File System* as the **Source**, select the .ova file for **File** and click **Continue**.

Please cho providers t	ose the source to import applia o import cloud VM from.	ance from. This can be a local file system to import OVF archive or one of known	n cloud servic
