Barracuda CloudGen Firewall

New

- User Defined Routing in Azure – Includes diagrams and links for different setups.

Updated

- How to Configure a High Availability Cluster in Azure with the Standard Load Balancer – Updated to reflect new Azure setup.
- How to Configure a High Availability Cluster in Google Cloud – Updated to reflect new Google Cloud setup.
- Azure Networking – Updated with description on default routes and links to UDR deployment methods.

Barracuda CloudGen Access

Updated

- The series of self-paced training videos for CloudGen Access has been updated to reflect version 2.0 of the product.
- How to Deploy CloudGen Access on a Virtual Appliance – Removed content for .OVA images since they are no longer supported.
- How to Get Started With CloudGen Access Vx – Added note about configuring a proxy regarding port 443.

Barracuda Content Shield

- Web Use Categories 3.2 – Updated for version 3.2 with new categories.

Barracuda Email Protection Plans

Cloud Archiving

Updated

- How to Configure Microsoft Exchange Online Email Import Using EWS – Added note that import tasks must be done in a certain order.
- How to Synchronize Folders – Added note that import tasks must be done in a certain order.

Cloud-to-Cloud Backup

Updated

- Barracuda Cloud-to-Cloud Backup Release Notes – Updated for February 2023 release.
- License Definitions – Added section for license count and billing.

Email Gateway Defense (formerly Barracuda Email Security)

New

- What is Email Backscatter and How to Prevent It

Updated

- Intent Analysis - Inbound Mail – Added new **Full URL Classifier** intent analysis.
- Email Gateway Defense Release Notes – Released February 8, 2023. Barracuda Networks

expands new end user interface in Email Gateway Defense. See Email Gateway Defense New User Interface User Guide.

Impersonation Protection (formerly Barracuda Sentinel)

Updated

- Spear Phishing Protection – Sender origination and DNS authentication information is displayed at the top of the message detail page.
- Targeted Phishing Attacks and their Signals – Updated message detail images.
- Barracuda Email Threat Scanner – Updated message detail images.

Security Awareness Training (formerly Barracuda PhishLine)

Updated

- Move to SSO – Updated the functionality of the upcoming **Convert to Barracuda SSO** button on the login screen. Also provided instructions for customers that have a BCC login, but continue to access Security Awareness Training manually with two-factor authentication.
- Click Thinking Content – Added the new Click Thinking newsletter, rollout guides, and the list of available training modules.
- How to Create a Dynamic Address Book – Updated steps to match current product functionality.

Barracuda Load Balancer ADC

New

- OpenSSL Vulnerabilities

Barracuda Web Application Firewall

New

- OpenSSL Vulnerabilities
- ManageEngine CVE-2022-47966 Vulnerability

Updated

- How to Secure HTTP Cookies

Barracuda WAF-as-a-Service

New

- [Traffic Rewrite](#) – Insert, remove, or rewrite headers before the request is forwarded to the backend server or the response is sent to a customer. You can also rewrite the URL to map to a different resource. Body Rewrite provides the ability to do a search and replace to content within a body response.

Updated

- [Access, Firewall, and Event Logs](#) – Greatly expanded and enhanced log filtering abilities.
- [Managing the datapath](#) – In the event of a 0-Day vulnerability, the datapath may be updated without the usual 90 notice for customers managing their own datapath.
