

Creating IP Address Block Exclusions lists

<https://campus.barracuda.com/doc/98213562/>

You can unblock an IP address that has been added to the **Block List** one of two ways:

- Remove the IP address from the **Block List**
- Override the block by adding the IP address to the **Block Exclusions List**

Block Exclusions Lists override **Block Lists**. If an IP address is on a **Block List** that is active and a **Block Exclusions List** that is active, the IP address is *not blocked*.

When to add an IP address to a Block Exclusions list

All IP addresses are unblocked by default and are only blocked when added to the **Block List**. Adding an address to the **Unblock List** is useful when an IP address is on the **Block List** but you don't want it blocked, for example, when you have put a range of addresses in the **Block List** and you want a single address in the range to be unblocked.

To configure blocking exclusions list

1. In Barracuda XDR Dashboard, click **Setup > IP Blocking**.
2. In **Account**, in the top navigation bar, ensure your corporate account is selected.
3. In the **Block List** section, in choose list, select a list.
4. Click **Configure**.
5. Type a new name.
6. Select the block lists to exclude.
7. Type the username of the **Authentication User**.
8. Type the **Authentication Password**.
9. Click **Save**.

To unblock a list of IP addresses

In this procedure, you select the list(s) of IP addresses to exclude from blocking.

1. In **Barracuda XDR Dashboard**, click **Setup > IP Blocking**.
2. In **Account**, in the top navigation bar, ensure your corporate account is selected.
3. In the **Block List** section, in **Choose list**, select a list.
4. Click **Configure**.
5. In the **Excluded Items** list, enable the check boxes of the blocking exclusion lists to unblock.
6. Click **Save**.

To add an IP address or range of IP addresses to a Blocking Exclusions list

1. In Barracuda XDR Dashboard, click **Setup > IP Blocking**.
2. In **Account**, in the top navigation bar, ensure your corporate account is selected.
3. In the **Block List** section, click **Add Item**.

4. Select a blocking exclusions list.
5. Type one or more of the following:
 - An IP address
 - A range of IP addresses

You can use IPv4 and IPv6 notation.

Separate IP addresses or ranges with a comma.

6. Optionally, type a comment.
7. Click **Save**.

To delete an item from a Blocking Exclusions list

If you delete an address or range from a Blocking Exclusions list, that address or range is blocked if it is on an active Block list.

1. In Barracuda XDR Dashboard, click **Setup > IP Blocking**.
2. In **Account**, in the top navigation bar, ensure your corporate account is selected.
3. In the **Block List** section, click **Add Item**.
4. Select a blocking exclusions list.
5. In the **Block List Items** list, click **Delete** next to the item you want to delete.
6. Optionally, type a comment.
7. Click **Save**.
