Customer Features

Updated Setup > Integrations page

The **Setup > Integrations** page has been updated to ensure users can easily find the integrations they are looking for. These changes include:

- Adding the ability to sort by **Name**, **Product**, or **Type**
- Displaying the connection type each integration uses (**Syslog**, **API**, or **Both**)
- Clarifying the descriptions so users have a better understanding what they can connect to and why
- Ensuring the names of products are updated

Bulk editing endpoints

On the **Infrastructure > Endpoint Devices** page, users can now edit multiple endpoints at once. This saves time when users want to perform the same action on a large number of devices. See below:
