

## Changing the Date Range Displayed on the Security Overview

<https://campus.barracuda.com/doc/98216643/>

Selecting a timeframe for the Security Overview changes the total alarms, total alerts, and open tickets displayed. It also changes the focus of the **Incident Timeline** graph and **Incident Geo Source** graphs.

For more information on events, alarms, and alerts, see [Introduction to Alarms, Alerts, and Events](#).

By default, the date range for the Security Overview is 1 Month. If you select another date range and then click **Clear All**, the date range returns to 1 Month.

Only one date range filter can be active at a time.

If you use the **Negate this condition** option when selecting a date range, all dates in the past are displayed except the chosen date range. For example, if you select a date range of **1 Week** and check the **Negate this condition** box, entries older than seven days are displayed.

The date ranges you can select are:

- **12 Hours** - Displays the previous 12 hours.
- **24 Hours** - Displays the previous 24 hours.
- **1 Week** - Displays the previous 7 days, including today. For example, if you select this option on May 8 at 11:00 am, the data from May 1 11:00 am to May 8 11:00 am is displayed.
- **2 Weeks** - Displays the previous 14 days, including today. For example, if you select this option on May 15 at 11:00 am, the data from May 1 11:00 am to May 15 11:00 am is displayed.
- **1 Month** - Displays the previous month, including today. For example, if you select this option on May 8 at 11:00 am, the data from April 8 11:00 am to May 8 11:00 am is displayed.
- **2 Months** - Displays the previous two months, including today. For example, if you select this option on May 8 at 11:00 am, the data from March 8 11:00 am to May 8 11:00 am is displayed.
- **3 Months** - Displays the previous three months, including today. For example, if you select this option on May 8 at 11:00 am, the data from February 8 11:00 am to May 8 11:00 am is displayed.
- **6 Months** - Displays the previous six months, including today. For example, if you select this option on May 8 at 11:00 am, the data from November 8 11:00 am to May 8 11:00 am is displayed.
- **1 Year** - Displays the previous year, including today. For example, if you select this option on May 8, 2025 at 11:00 am, the data from May 8, 2024 11:00 to May 8, 2025 at 11:00 am is displayed.
- **2 Year** - Displays the previous two years, including today. For example, if you select this option on May 8, 2025 at 11:00 am, the data from May 8, 2023 11:00 to May 8, 2025 at 11:00 am is displayed.

The Security Overview doesn't refresh on a regular basis. To refresh the Security Overview, select the timeframe again.

#### To change the timeframe displayed on the Security Overview

1. In Barracuda XDR Dashboard, click **Intelligence > Security Overview** .
2. Click **Date Range** button in the top left corner of the window.
3. Select one of the following options:
  - **12 Hours**
  - **24 Hours**
  - **1 Week**
  - **2 Weeks**
  - **1 Month**
  - **2 Months**
  - **3 Months**
  - **6 Months**
  - **1 Year**
  - **2 Year**
4. Click **Apply Changes**.

The Security Overview refreshes, displaying the timeframe.
