

## Muting and Un-Muting Log Degradation Threshold Warnings on the Home Dashboard

<https://campus.barracuda.com/doc/98219206/>

You have two options for muting log degradation threshold warnings:

- Snoozing warnings
- Disabling warnings

For more information about log degradation threshold warnings (also known as [log loss alarms](#)), see [Setting up Log Degradation Threshold Warnings on the Home Dashboard](#).

The difference between snoozing a warning and disabling it is that snoozing a warning is temporary and disabling is permanent.

You can snooze a warning for 24 hours or 1 week. When that timeframe is over, the warning automatically unsnoozes. You can also unsnooze a warning at any time during the snooze period.

You can also disable warnings so you won't receive any warnings until you enable the warnings again.

#### To snooze log degradation warnings for a data source

1. In **Barracuda XDR Dashboard**, click **Home**.
2. Optionally, click the **Next** button until you see the data source you want to mute log loss alarms for.
3. Click a row in the **Data Sources** table.
4. Click one of the following:
  - **24 hour snooze**
  - **1 week snooze**
5. Click **Save**.

#### To un-snooze log degradation warnings for a data source

1. In **Barracuda XDR Dashboard**, click **Home**.
2. Optionally, click the **Next** button until you see the data source you want to un-mute log loss alarms for.
3. Click a row in the **Data Sources** table.
4. Click **Un-snooze**.
5. Click **Save**.

---

**To disable log degradation warnings for a data source**

1. In **Barracuda XDR Dashboard**, click **Home**.
2. Optionally, click the **Next** button until you see the data source you want to disable warnings for.
3. Click a row in the **Data Sources** table.
4. Click **Disable Notification**.
5. Click **Save**.

**To enable log degradation warnings for a data source**

1. In **Barracuda XDR Dashboard**, click **Home**.
2. Optionally, click the **Next** button until you see the data source you want to enable warnings for.
3. Click a row in the **Data Sources** table.
4. Click **Enable Alarms**.
5. Click **Save**.
