

## Enforcing a Web Scraping Policy

<https://campus.barracuda.com/doc/98219552/>

To enforce a web scraping policy for a web application, perform the following steps:

1. [Add a Bot to the Allowed Bots List](#)
2. [Create a Web Scraping Policy](#)
3. [Associate the Web Scraping Policy with a Service](#)

### Step 1 - Add a Bot to the Allowed Bots List

1. Go to the **BOT MITIGATION > Libraries** page, and click **Add Bot** in the **Allowed Bots** section.
2. In the **Add Bot** page, specify values for the parameters (Parent Name, User Agent and Host).
3. Click **Save**.

### Step 2 - Create a Web Scraping Policy

1. Go to the **BOT MITIGATION > Bot Mitigation** page, and click **Add Policy** in the **Web Scraping Policies** section.
2. In the **Add Web Scraping Policy** page:
  1. Specify values for the parameters under **Honey Traps** and **Bot Detection**.
  2. Select the allow-listed bot created in [Step 1 - Add a Bot to the Allowed Bots List](#).
  3. Select the categories that you want to block.
  4. Click **Save**.

### Step 3 - Associate the Web Scraping Policy with a Service

1. Go to the **BOT MITIGATION > Bot Mitigation** page.
2. In the **Bot Mitigation Policy** section:
  1. Identify the service that you want to associate the web scraping policy to.
  2. Click **Edit** next to the URL policy associated with the service.
3. In the **Edit URL Policy** page:
  1. Set **Status** to *On*.
  2. From the **Bot Detection** section, select the policy created in [Step 2 - Create a Web Scraping Policy](#) from the **Web Scraping Policy** list.
  3. Specify values for other parameters as required and click **Save**.
