

Integrating the VMware ESXi Service Module

<https://campus.barracuda.com/doc/98220745/>

A service module is an enhanced policy module that includes dashboards, monitors, reports and scripts. Service modules enable Barracuda Networks Barracuda RMM to integrate with different software vendors. The service module covered in this guide is for VMware®.

This section provides detailed information about the following topics:

- [About the VMware ESXi Service Module](#)
- [User Requirements and Setup](#)
- [Understanding the Terminology for VMware ESXi](#)
- [Navigating the VMware ESXi Service Module](#)
- [Viewing and Managing VMware Inventory](#)
- [Identifying and Addressing Issues with VMware](#)
- [Performing Guest State Management in VMware](#)
- [Upgrading VMware Tools on a Guest Machine](#)
- [Managing VMware Snapshots](#)
- [Viewing the Status of Commands in VMware](#)
- [Creating VMware ESXi Reports](#)

You can find more information about VMware at the following URL: www.vmware.com
