

# Integrating Bitdefender GravityZone

https://campus.barracuda.com/doc/98223988/

To integrate Bitdefender GravityZone, you must do the following:

- 1. Create an API Key which will allow sending security Push Events from GravityZone to Barracuda XDR.
- 2. Enter the API Key obtained from Bitdefender in the Barracuda XDR Security Dashboard.

See the procedures below.

## To create a Bitdefender GravityZone API key

- 1. Log in to <u>Bitdefender GravityZone Cloud Console</u>.
- In the top-right corner, select the drop-down with the authenticated user's name, then select My Account.

3. In the **API keys** section at the bottom of the page, click the **+ Add** button.

| API keys                 |     |         |
|--------------------------|-----|---------|
|                          |     |         |
| 🕂 Add 🗇 Delete 🔅 Refresh |     |         |
| Description              | Кеу | Created |

4. Type an **API Key Description**.

| API key                        |                          |  | × |
|--------------------------------|--------------------------|--|---|
| API Key Description: *         | SKOUT Integration        |  |   |
| Enabled APIs:                  | Companies API            | Reports API  |   |
|                                | Licensing API            | Accounts API   |   |
|                                | Packages API             | Incidents API  |   |
|                                | Network API              | Quarantine API   |   |
|                                | Integrations API         | Event Push Service API                                     |   |
|                                | Policies API             |  |   |
|                                | Maintenace Windows A     | PI   |   |
| Save                           | Cancel                   |  |   |
| . Select the following         | g checkboxes:            |  |   |
| <ul> <li>Companies</li> </ul>  | ΑΡΙ                      |  |   |
| <ul> <li>Event Push</li> </ul> | Service API              |  |   |
| . Click <b>Save</b> .          |                          |  |   |
| . Select the newly-cr          | eated API key from the   | e list.  |   |
| API keys                       |                          |  |   |
| 🕂 Add 🗇 Delete 💿 R             | efresh                   |  |   |
| Description                    | Кеу                      | Created  |   |
| SKOUT Integration              | 86c903813155175696b02100 | 5f7061f25e1460ci Fri Sep 16 2022 22:03:28 GMT-0400 (Easter |   |

8. Copy the API Key.

| API key                |                                    |                                 | ×        |
|------------------------|------------------------------------|---------------------------------|----------|
| Key:                   | 86c903813155175696b021005f7061f25e | e1460c79112c387d3d801158b43963a | <b>i</b> |
| API Key Description: * | SKOUT Integration                  |                                 |          |
| Enabled APIs:          | Companies API                      | Reports API                     |          |
|                        | Licensing API                      | Accounts API                    |          |
|                        | Packages API                       | Incidents API                   |          |
|                        | Network API                        | Quarantine API                  |          |
|                        | Integrations API                   | Event Push Service API          |          |
|                        | Policies API                       |                                 |          |
|                        | Maintenace Windows API             |                                 |          |
| Save                   | Cancel                             |                                 |          |

### **Barracuda XDR Dashboard**

When you enter the API Key obtained from Bitdefender GravityZone, the key type will be detected automatically:

• Direct Key - Applies to a single Barracuda XDR account.

| Integration: Bitdefender | Help 🖄 |
|--------------------------|--------|
| Setup Instructions       |        |
| Z Enabled                |        |
| Арі Кеу                  |        |
| •••••••                  |        |
| Test Save                |        |

• MSP Key - Can be applied to multiple Barracuda XDR accounts.

| Setup Instructions |  |
|--------------------|--|
| ✓ Enabled          |  |
| Арі Кеу            |  |
| ••••••             |  |
| Company Name       |  |
| SMB                |  |

When an MSP key is used the settings are shared by all accounts. If you disable the integration for one account, it will disable for all.

#### To enter the API key in Barracuda XDR Dashboard

- 1. In Barracuda XDR Dashboard, click **Administration** > **Integrations**.
- 2. On the Bitdefender card, click **Setup**.
- 3. Do one of the following:
  - If the Company Name field is not displayed, a Direct Key has been detected. Proceed to step 4.
  - If the **Company Name** field is displayed, an **MSP Key** has been detected. Select the company that corresponds with the selected XDR account.
- 4. Click test to verify the key has the correct permissions.
- 5. If the test succeeds, click **Save**.
- 6. If you are using an MSP Key, repeat this process for each account you would like to monitor.
