

## Overview (Application View)

<https://campus.barracuda.com/doc/98225854/>

The **OVERVIEW** section provides information on unique clients, unique IP addresses, and the geographical distribution of the incoming traffic. The traffic is classified as humans, good bots, and bad bots.

- **Traffic** – The graph displays the trend of requests that are classified as humans or bots (good and bad) for the selected time scale.
- **Unique IPs** – Displays the client IP addresses classification trend.
- **Clients** – Displays the client fingerprints classification trend.
- **Origins** – Provides information on the number of requests originating from different geographical locations. Hover over the map to view the number of requests originating from a particular region/country. **All Traffic** displays both good and bad bot requests. To see specific bot requests, click **Good Bots** and **Bad Bots** respectively.
- **Application Response** – Displays the distribution of HTTP response status codes.
- **Humans vs Bots** – Displays the distribution of requests received from humans and bots (good and bad).
