How to Update Your Notification Email Addresses

https://campus.barracuda.com/doc/99614861/

In order to prevent the impersonation of our trusted brand and avoid any confusion and risk for our customers, Barracuda Networks is taking steps to harden our email-sending domains to enforce DMARC policy. This important measure will prevent the potential threat of an adversary looking to impersonate Barracuda Networks to cause any harm to our customers.

As we implement this control, we advise all of our customers to change their notification email address(s) and the SMTP server setting on their Barracuda Networks appliance(s) to use their domain/email address instead of '*Barracuda*'. Please do so to ensure your email provider accepts your notification emails from your Barracuda Networks appliance.

Here are instructions to assist with the change:

1. Go to the **BASIC > Administration** page.
2. Scroll down to the **Email Notifications** section.
3. Set the **From Address**, **System Alerts Email Address**, and **System Contact Email Address** values to an address using one of your organization's domains, not '*@barracuda.com*'.
4. Click **SAVE** at the top right of the page.
