

## Install Device Manager on macOS 13.4 Ventura and above

<https://campus.barracuda.com/doc/99615396/>

Due to changes in permissions and security with macOS 13.4 Ventura, it is now required to disable SIP (System Integrity Protection) temporarily.

- Restart into Recovery mode
- Open Terminal from the Utilities Menu
  - Run the command *csrutil disable*
- Restart into normal mode
- Install the Device Manager
- Reboot back into Recovery mode
- Open Terminal from the Utilities Menu
  - Run the command *csrutil enable*

For more information on enabling and disabling SIP see:
