Hardware Licensing

https://campus.barracuda.com/doc/99617355/

A CloudGen Firewall hardware appliance is bound to a license on activation. If the appliance must be replaced (RMA), the existing license will be transferred to the replacement unit.

There are no capacity restrictions for hardware appliances. The only restriction is the system performance of the hardware itself. An unlimited number of protected IP addresses, SSL VPN users, and HTTP proxy users (Virus Scanner and Web Security Gateway) are included. Nevertheless, there might be some feature differences between hardware models. Please check model details on the datasheet.

Included Features

The functionality of SSL VPN and SSL Inspection is included with every CloudGen Firewall, except for the F10, F100, and F101 models.

Environment and number of files inspected per month

Hardware	# of files	Virtual and Public Cloud	# of files
F18	108000	VFC1	108000
F80	108000	VFC2	216000
F180	108000	VFC4	324000
F280	216000	VFC8	648000
F380	260000	VFC16	750000
F400	324000	VFC48	1000000
F600	540000	-	-
F800	750000	-	-
F900	1000000	-	-
F1000	on request	-	-

For information on how to activate licenses on Barracuda CloudGen Firewall hardware appliances, see the Licensing section in the CloudGen Firewall documentation.
