

## Barracuda XDR Release Notes — July 2023

<https://campus.barracuda.com/doc/99618036/>

The Barracuda XDR July release includes the following features:

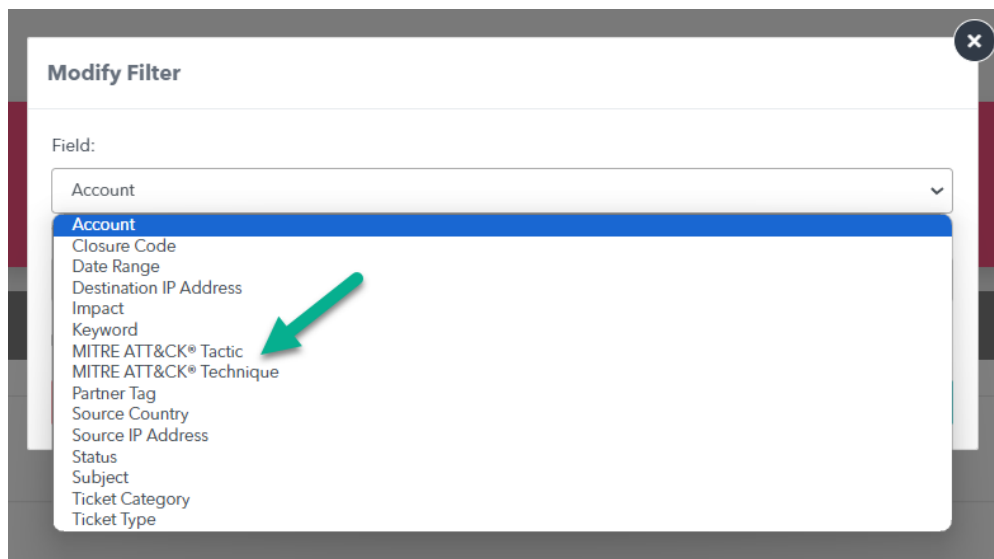

### All Alarms and Alerts are now mapped to the MITRE ATT&CK® framework

Every Barracuda XDR Alarm and every Alert is now mapped to the MITRE ATT&CK® framework so they can be easily identified, communicated, and mitigated.

### MITRE ATT&CK® Tactics and Techniques can now be used as filters

Using a MITRE ATT&CK® Tactic or Technique as a filter lets you instantly focus the information in the UI or Report on the most meaningful information for your needs. To do this, select one of the following from the Filter dropdown:

- MITRE ATT&CK® Tactic
- MITRE ATT&CK® Technique

### Reporting updates: Customizable emails and UI enhancements

You can now customize the emails that you send with Reports. This lets you personalize the email to

---

add impact and context for the recipient. This also facilitates sending different reports with different intentions.

The Report UI has also been enhanced to better distinguish between sharing a Report in the XDR Dashboard and emailing a Report.

## **Cisco Umbrella self-service integration**

---

You can now connect your Cisco Umbrella firewall data to Barracuda XDR, minimizing any monitoring delay.

## **Support for data hosting in Canada and India**

---

Hosting data in the user's desired location assures that local compliance requirements are accommodated.

## **Multiple "Closed" statuses are supported for ConnectWise integrations**

---

ConnectWise integrations now support multiple "Closed" statuses, ensuring that you can continue to use ConnectWise the way that suits you best.
