Setting up Linux Server Collector

https://campus.barracuda.com/doc/99621408/

This setup is for the XDR Collector only. If you are using a physical or virtual sensor, refer to Integrating Linux Server.

To integrate Linux Server Collector, follow the procedures below:

- **Enable the Linux Server Collector**
- **Install the XDR Collector**

Enable Linux Server Collector

1. In **Barracuda XDR Dashboard**, navigate to **Administration** > **Integrations**.
2. On the **Linux Server Collector** card, click **Setup**.

3. Select the **Enable** check box.

4. Click **Save**.

Install the XDR Collector

- If you haven't already set up the XDR Collector, do one of the following:
  - [Setting up the XDR Collector for Windows](#)
  - [Setting up the XDR Collector for Linux](#)
