

Data Security Compliance Enabling You to Comply with Data Regulations

Many businesses are subject to regulations that govern how they protect sensitive data. Failure to comply with any one of these regulations can often lead to serious fines and ramifications. It's up to IT services providers to be the last line of defense for their SMBs.

Intronis takes compliance seriously. That's why we have taken steps to ensure that our software and our operations abide by the strictest security controls required by major industry and federal regulations. See how Intronis enables you to satisfy all major compliance regulations and keep SMB data safe.

HIPAA

Requires the protection of confidentiality and security of healthcare information

How we comply:

- Military-grade data encryption in transit and at rest
- Redundant secure data centers
- Password protected access to backups

FERPA

Requires the protection of confidentiality and security of educational records

How we comply:

- Military-grade data encryption in transit and at rest
- Redundant secure data centers
- Password protected access to backups

FINRA

Dedicated to investor protection and market integrity through effective and efficient regulation of the securities industry

How we comply:

- Features such as built-in access controls and audit logs
- FINRA-compliant data infrastructure
- Data retention is managed by partner

PCI

Payment Card Industry Data Security Standard for protecting credit cardholder data

How we comply:

- Software does not store full track or magnetic stripe data
- Encrypt data in transit and at rest
- Access controls to prevent unauthorized access to data

Safe Harbor

Prohibits personal data transfer to non-European Union countries that do not meet EU standards for adequate data protection

How we comply:

- Software and operations meets EU data protection standards
- Partners can receive and process personal data from the EU and Switzerland

Sarbanes-Oxley Act (SOX)

Requires publicly traded companies to be more transparent in their practices

How we comply:

- Our SSAE16 Type II audit report addresses what companies need to verify our services

Graham-Leach-Bliley Act (GLB)

Requires businesses to have an information security program, and designate someone to oversee it and perform annual risk assessment

How we comply:

- Our SSAE 16 Type II audit addresses these needs

SSAE-16 Type II

Standard for reporting on controls for a service organization

How we comply:

- Subject to rigorous independent annual audits

.....▶ ABOUT INTRONIS MSP SOLUTIONS BY BARRACUDA

Intronis MSP Solutions by Barracuda is the first single-source vendor to combine security and backup solutions tailored specifically for managed service providers. Intronis enables MSPs to centrally deploy and manage a broad portfolio of services, protecting business-critical files, folders, email, applications, servers and networks — both locally and in the cloud — through a single-pane-of-glass management console. MSPs benefit from core PSA and RMM integrations, as well as a true partnership with Intronis, through fixed pricing plans and partner enablement tools that help MSPs accelerate growth and increase profits.
